# COURSE INFORMATION

## OVERVIEW

The New Advances in Inflammatory Bowel Disease conference will highlight the latest concepts in the diagnosis and treatment of IBD. Disease complications, special population considerations, and surgical options will also be discussed. The course will be taught by nationally known experts who are actively involved in clinical trials and studies related to the management of Crohn's and colitis. Physicians will be provided with the necessary context to integrate the relevant information into their practices to improve the quality of life for their afflicted patients.

## TARGET AUDIENCE

This course is designed for gastroenterologists, nurses, internists, colorectal surgeons, and allied health professionals involved in the care of patients with Inflammatory Bowel Disease (IBD).

## EDUCATIONAL OBJECTIVES

**After attending this activity, participants should be able to:**

- Summarize recent clinical trial data regarding the next generation of therapies in inflammatory bowel disease.
- Incorporate new diagnostic methods into practice for inflammatory bowel disease.
- Evaluate current and future treatment and therapy options for inflammatory bowel disease.
- Identify treatment challenges in patients with inflammatory bowel disease.
- Assess surgical options for the treatment of inflammatory bowel disease.
- Analyze complementary therapies in the treatment of inflammatory bowel disease.
- Employ strategies for managing pregnancy and fertility issues in patients with inflammatory bowel disease.
