The 2011 San Diego Day of Trauma

From Scene to Survival: The Crucial First 24 Hours

October 28 - 29, 2011
Hyatt Regency Mission Bay
San Diego, California
COURSE INTRODUCTION

Course Overview
The 2011 San Diego Day of Trauma will focus on the first 24 hours of trauma care and the key steps to ensure survival after severe injury. Conference topics will range from the highly volatile environments of the scene and transport, through resuscitation, and on to the emergency surgery and critical care principles that are essential to the survival of patients with devastating injuries. Our nationally renowned faculty will present the state of the art management of these life threatening emergencies. Conference speakers will include specialists in the fields of pre-hospital care, trauma surgery, and critical care. All new lecture material, case presentations, and interactive sessions make this another “must see” event for trauma and emergency medicine professionals.

Conference Highlights
• Expanded two-day curriculum
• Specialists from all aspects of trauma care represented
• Multiple panel discussion segments with ample question and answer time with faculty
• Extended case presentation segment focusing on real-life trauma cases
• American Red Cross Blood Drive on Friday
• Conference recording sent to all attendees 6-8 weeks after the conference

Educational Objectives
After attending this activity, participants should be able to:
• Employ current technology and techniques for optimal care of diverse trauma, critical care, and emergency medicine-related issues.
• Recognize the key points in the initial management of life threatening hemorrhage.
• Identify the criteria for immediate transfer to the operating room from the field.
• Determine effective care plans for trauma patients based on real-life case presentations.
• Describe the management principles of compound and multiple torso injuries.
• Integrate measures for the management of severe head injuries.
• Illustrate current concepts and methods for the management of complex orthopedic injuries.
• Demonstrate the importance of restoring blood volume following severe hemorrhage.
• Apply knowledge gained and lessons learned to provide quality trauma care both in the field and hospital settings.

TARGET AUDIENCE
• Trauma Specialists
• Critical Care Specialists
• Emergency Medicine Specialists
• Pre-hospital Personnel
• First Responders
