Research

Resident research is a tradition at the Scripps Clinic/Scripps Green Hospital Internal Medicine Residency Program. Residents are required to conduct research and are mentored throughout the process. As a result, their research is often accepted for presentation at regional and national meetings, as well as publication in peer-reviewed journals. Residents have presented their research and vignette posters at the American College of Physicians National Scientific Meeting in nine of the past ten years. In addition, our residents regularly present and defend their research at national subspecialty meetings, including the American Heart Association, American Society of Hematology and the American College of Gastroenterology.

1. Benton Ashlock, MD, Ken Serio, MD. Employment of a standardized management strategy for asymptomatic distal deep venous thrombosis in the ICU. Southern California Regional ACP Scientific Session 2011, Research First Place, and ACP National Annual Scientific Meeting, April 2012.

3. Ana Crissien, MD, Emily Singh, MD. Marijuana: anti-emetic or pro-emetic? American College of Gastroenterology Annual Scientific Meeting, October 2012.

5. Kristen Rogers MD, Joel Diamant MD. The end of MRSA as we know it: early genomic prediction of MRSA virulence. Schultz Family Award for Clinical Research, 2012 Winner.

8. Charles Feng, MD, Andrew White, MD, Donald Stevenson, MD. Characterization of aspirin allergies in patients with coronary artery disease. Resident Research Project 2012, manuscript submitted to Annals of Allergy, Asthma, & Immunology.
