# Course Introduction

## Course Overview

Scripps MD Anderson Cancer Center's 2023 Oncology Update is a one-day conference designed to offer physicians and advanced practice providers an overview of the most recent advances in the treatment of hematologic and oncologic malignancies. During this comprehensive educational course, clinical experts in the field will review the latest clinical data and practice-changing findings from a wide variety of recently published studies and conference presentations. Esteemed faculty will review exciting and important developments and discuss their relevance to clinical practice.

## Educational Objectives

After attending this live activity, participants should be able to:

- Integrate evidence-based treatment strategies into clinical practice to optimize patient outcomes and clinical care.
- Evaluate the latest advances in clinical oncology research and their implications for patient care.
- Examine the impact of novel diagnostic techniques in the management and assessment of various oncologic malignancies.
- Recognize and manage common and more recently appreciated side effects of cancer therapy including cardiotoxicities and immune-related adverse events.
- Implement multidisciplinary collaboration and shared decision making into the management of complex patient cases and addressing treatment-related complications.
