Course Introduction

Course Overview

Scripps Health's Primary Care Summer Conference was designed by primary care physicians for primary care physicians and will present content from their unique perspective. This important CME conference will educate and promote improved patient outcomes in a broad range of therapeutic areas commonly encountered in the busy primary care practice. The 2019 conference will include updates on infectious diseases, diabetes management, human trafficking, neurology, cardiology, and a number of other important conditions providers come across in practice. In addition to an overview of the history and current science of a variety of specialty areas, content will be presented in a very practical, patient-focused manner relevant to the specific primary care setting and challenges.

Conference Highlights

- Presentation of a wide variety of therapeutic areas commonly encountered in primary and family practice settings
- Practical and useful content, including pearls, additional resources, course materials and recordings for later reference
- Dynamic and interactive formats including case studies, audience response system, and ample opportunities for Q&A
- Half-day schedule at one of San Diego's most popular vacation destinations allowing time for learning and relaxation

Educational Objectives

After attending this live activity, participants should be able to:

- Discuss the history, science and evidence of commonly encountered therapeutic areas.
- Integrate current trends in preventive health care into patient care strategies.
- Diagnose frequently encountered medical conditions using office examinations and formal diagnostic techniques.
- Formulate a comprehensive treatment program for various health issues, coordinating other team members within the practice to support the patient care strategy.
- Manage the specialist referral process: assess when to refer, recognize what the specialized treatment will consist of, and determine the role of the primary care physician in cohesive care and follow-up.
- Identify common overlapping or related conditions.
- Access and/or recommend resources for both physicians and patients to acquire additional information pertinent to a range of therapeutic areas.
- Effectively discuss with patients their personal responsibilities in prevention and treatment.

Target Audience

- Family Medicine
- Internal Medicine
- General Practitioners

Dermoscopy Workshop

Additional fee

This interactive, three-part skills workshop is designed for physicians looking to introduce dermoscopy into their practice or further their skill set. Part one will offer an introduction to dermoscopy and its use in identifying melanoma skin cancer. Part two will consist of reviewing real-life cases and slides allowing participants to apply what they have learned thus far. Part three will offer participants the chance to use dermoscopes to conduct skin exams. The workshop will be taught to a limited audience allowing for extensive interaction with the expert speaker. Participants in attendance will earn an additional 3 AMA PRA Category 1 Credits™.
