

15th Annual The Fundamentals of Diabetes Management Thursday, May 31, 2018

The Schaetzel Center – Scripps Memorial Hospital La Jolla, California

Overview

Scripps Whittier Diabetes Institute's Fundamentals of Diabetes Management training covers basic concepts with latest updates related to diabetes management and treatment, including prevention of complications, nutrition, physical activity, behavior modification, and standards of care.

Conference Highlights

- Plenary talks from nationally recognized experts
- Presentations on developments, and current advances in diabetes care
- In-depth hands on and small group sessions on pertinent topics
- Networking opportunities among colleagues
- Conference app with access to course materials and recordings from the convenience of your mobile device or computer

Educational Objectives

After attending this live activity, participants should be able to:

- Describe the latest standards of care, treatment targets and mechanisms for treating diabetes
- Assess unmet needs and treatment patterns of patients with diabetes
- Review the role of therapeutic classes in practice recommendations when treating patients with diabetes
- Develop individualized approaches to improve outcomes for the complications of diabetes in the ambulatory settings
