Course Overview

As the incidence of melanoma continues to rise rapidly in the United States and around the world, the need to educate clinicians from various specialties on the disease also increases. During this course nationally recognized experts will present information on prevention, risk assessment, early detection, genetic factors, and current and future treatment choices for melanoma patients. Issues concerning surgical management, adjuvant therapy, advanced disease therapy, and personalizing the course of treatment for individual patients will also be discussed. This course is designed to provide information that will help clinicians in their decision making regarding these difficult patient problems. The course will be taught by a wide range of experts as this most serious of skin cancers will require multidisciplinary efforts to conquer.

Conference Highlights

- Plenary talks from nationally recognized experts
- Presentations on hot topics, upcoming scientific developments, and current advances in prevention, risk assessment, early detection, genetic factors, and current and future treatment choices for melanoma patients
- Networking opportunities among colleagues
- Conference app with access to course materials and recordings from the convenience of your mobile device or computer

Educational Objectives

After attending this live activity, participants should be able to:

- Demonstrate how newly discovered, evidence-based scientific information applies to the current practice of clinical dermatology.
- Describe the epidemiology and risk factors associated with the increasing incidence of cutaneous melanoma.
- Examine current data and new strategies for the prevention of melanoma.
- Evaluate and diagnose a variety of malignancies related to melanoma skin cancer.
- Identify possible genetic mutations and etiologic factors in the melanoma patient and diagnose patients based on dermatologic manifestations.
- Incorporate new diagnostic techniques, including dermoscopy, into practice.
- Determine appropriate treatment for patients with metastatic melanoma, melanonychia and ocular melanoma.
- Integrate new therapies and treatments for advanced melanoma including surgical techniques.
- Discuss the effectiveness of neoadjuvant therapy and immunotherapy in treating melanoma.
- Navigate the medico-legal aspects of caring for the melanoma patient.
- Recommend strategies for managing patients with multiple melanomas.
- Provide optimal follow-up of patients after melanoma treatment.

Physicians

Scripps Health is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Scripps Health designates this live activity for a maximum of 13 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Credit Breakdown

Dermoscopy Workshop (Fri): 2
Main Conference (Sat-Sun): 11
Total Credits Available: 13

Nurses

For the purpose of recertification, the American Nurses Credentialing Center accepts AMA PRA Category 1 Credit(s)™ issued by organizations accredited by the ACCME. For the purpose of re-licensure, the California Board of Registered Nursing accepts AMA PRA Category 1 Credit(s)™. The majority of state boards accept AMA PRA Category 1 Credit(s)™ as meeting continuing education requirements for license renewal. Nurses should check with their state’s Board of Registered Nursing regarding use of CME credit.

Physician Assistants

PAs may claim a maximum of 13 Category 1 credits for completing this activity. NCCPA accepts AMA PRA Category 1 Credit™ from organizations accredited by ACCME or a recognized state medical society.

Commercial Support

This course is supported, in part, by educational grants from industry, in accordance with ACCME Accreditation Standards for Commercial Support. Appropriate acknowledgment will be given to all supporters at the time of the educational activity.
