Course Overview
Scientific evidence has shown that food choices and certain supplements can improve health and symptoms of disease. As a result, many Americans are self-prescribing and spending in excess of $20 billion annually on herbal and dietary supplements to address their health concerns. It is important for health care providers to receive timely, evidence-based information in order to address the risks and benefits of supplements with their patients. In this dynamic partnership with patients, providers also need information about regulatory issues, dosing and product potency. To address these needs, world-renowned faculty will present a concise, clinically relevant overview of natural supplements in evidence-based practice, with an emphasis on disease states. As part of this informative and comprehensive CME conference, attendees will have the opportunity to participate in a full day of highly interactive workshops in order to fine tune clinical applications. This medical education event is a must-attend for anyone wanting to acquire a wide-range of knowledge and expertise for addressing and managing dietary supplement use.

Course Highlights
• 3-days of evidenced-based educational courses presented by leading experts
• Full day of interactive workshops to fine tune clinical applications
• Opportunities to interact with faculty and fellow attendees to establish a network of like-minded professionals
• Emphasis on disease states
• A mobile app will provide you with access to conference course materials from the convenienece of your mobile device or computer

Educational Objectives
After attending this activity, participants should be able to:
• Recognize the potential role of supplements in preventive medicine and in the management of common medical conditions.
• Judge the regulatory aspects of the supplement industry and their implications for clinical and research practice.
• Discuss current research and literature related to natural supplements.
• Examine, through evidence-based summaries, key supplements used in clinical practice, including their indications, side effects, interactions and contraindications.
• Formulate a patient care treatment program that integrates supplements in preventive medicine and in the management of common medical conditions.
• Access and/or recommend resources for acquiring additional supplement related information for the clinician or patient.
• Increase proper supplement usage by patients by involving the patient as an active partner in care, with an emphasis on patient education, acceptance and compliance.

Target Audience
This course is intended for physicians, naturopathic doctors, nurse practitioners, nurses, nurse midwives, acupuncturists, chiropractors, dietitians, pharmacists, physician assistants, psychologists and any other health care professional who makes nutritional recommendations or manages dietary supplement use.

Accreditation
Scripps Health is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
