Together, We Will Go Far

Our founders, Ellen Browning Scripps and Mother Mary Michael Cummings, knew that the only way to be successful in providing health care for our community was through the continued commitment and support from those who shared their vision.

These extraordinary facilities will serve as beacons of health for patients in San Diego and throughout the West Coast. Our friends, Jack and Eileen Anderson, were instrumental in our efforts last year, donating $25 million to the campaign.

Your generosity has also helped us achieve our $38 million Phase I goal of the Campaign for Scripps Encinitas, an unprecedented fundraising effort to expand critical care and emergency services for North County communities. With your help, the hospital will open the doors of a leading-edge, expansive new emergency department and acute care facility in 2014 that will serve patients and families for years to come.

Another longtime supporter of Scripps Clinic, Darlene Shiley, committed $5 million to help build the Donald P. and Darlene V. Shiley Musculoskeletal Center, which will consolidate our orthopedic subspecialties to offer comprehensive treatment and research at one convenient location.

You will also read more about how your contributions are helping to advance cancer care and genomic medicine; support robotic surgery and women’s services; and expand health care for all those in need.

Throughout our history, philanthropy has been crucial in our ability to provide excellent health care. On behalf of Scripps Health, thank you for helping us go as far as we can to serve our community.

There is a proverb that recognizes the importance of our donors in supporting our mission of caring for our community:

“If you want to go quickly, go alone. If you want to go far, go together.”

Embracing this theme, we have combined our separate campus stewardship reports into one to give you insight about how your donations work together across the Scripps Health system to save lives every day. Whether you support one of our capital campaigns, donate to a specific area of medicine or research, or provide unrestricted funds to support our greatest needs through Scripps President’s Council, your contributions help us go farther than we ever could alone.

Through your support of the Campaign for Cardiovascular Care, we are building the Prebys Cardiovascular Institute, a state-of-the-art heart hospital that will open in 2015; and the John R. Anderson V Medical Pavilion, a new Scripps Clinic facility that will be connected to the institute.

John B. Engle
Chief Development Officer
Scripps Health Foundation
INVESTING IN THE FUTURE

Scripps Health is at the forefront of medicine and, with philanthropic support, we are continuing to break ground on new medical discoveries and innovations. Donations from loyal supporters are helping us advance leading-edge treatment and care, train the next generation of physicians and build state-of-the-art facilities that will serve as models of medical excellence and research well into the 21st century. Your investment in Scripps is an investment in our community that will have a lasting, positive impact on thousands of lives every day.
The Campaign for Cardiovascular Care
*Supporting a New Era in Heart Excellence*

The Campaign for Cardiovascular Care continues our legacy of providing innovative health care and advancing breakthrough research to benefit patients in San Diego — and beyond. The centerpieces of the three-year $180 million campaign are the Prebys Cardiovascular Institute and the John R. Anderson V Medical Pavilion. Located on the campus of Scripps Memorial Hospital La Jolla, these magnificent additions will create an unrivaled destination for heart care and specialty medical services to heal hearts and save lives for years to come.

In fiscal year 2012, we reached significant campaign milestones. Funds raised to date total nearly $110 million in community support, and $830,000 from the staff and employees at Scripps La Jolla who participated in the spirited campus fundraising campaign, “We Got the Beat.” This tremendous commitment from our employees reflects the pride they have in the work we do for our patients and their families.

Last year we also formed the campaign cabinet. These generous community leaders are volunteering significant amounts of their time and resources, offering important insight and vision to help steer our efforts as we move toward our goal.

We are thankful to all those who have helped us come so far so quickly. Every gift we receive illustrates the faith and trust you have in us, and supports our ability to remain at the forefront of medicine.

Conrad Prebys signs one of the last steel beams placed atop the Prebys Cardiovascular Institute last summer.

The Prebys Cardiovascular Institute will open in 2015.
For the third consecutive year, in 2012 Scripps Health was recognized by U.S. News & World Report as among the best in the nation for cardiology and heart surgery. We are the largest heart care program in the region, serving more than 55,000 patients each year and entrusted by Kaiser Permanente to provide services to more than a half-million of its members.

With your help, we are expanding on this foundation of medical excellence to create a world-class heart hospital, the Prebys Cardiovascular Institute.

The Prebys Cardiovascular Institute, a specially designed seven-story landmark, combines the most advanced medical innovation and technology to serve our community.

Designed with input from physicians, nurses and other caregivers, the institute features:
- All private rooms: 108 medical/surgical beds and 59 intensive care beds
- State-of-the-art operating rooms that will accommodate robotic procedures
- Hybrid operating suites for both open heart surgery and catheter-based procedures
- Patient-centered rooms with natural light and views of nature
- Three catheterization and electrophysiology labs to provide comprehensive services, including angioplasty and stent procedures

Thanks to the historic $45 million leadership gift from San Diego philanthropist and businessman Conrad Prebys, and the generosity of other donors, the last steel beam was placed on the 383,000-square-foot building in May 2012. In 2013, we will achieve other construction milestones as the walls go up and we build the infrastructure necessary to complete this heart hospital of the future.

Your Support Matters
Join us as we invest in the future of health care. The Prebys Cardiovascular Institute offers a unique opportunity to support leading-edge health care and advance the future of medicine. For more information about how you can support the Campaign for Cardiovascular Care, contact us at 858-626-6357 or visit scripps.org/heartcampaign.
Gene and Taffin Ray Make $1 Million Gift to Support Scripps

Recognized as a leader in ingenuity, Gene Ray, PhD, co-founder of Titan Corporation, appreciates advancements that help make our lives safer, healthier and more efficient. True to his innovative spirit, Gene invests in medical excellence that impacts the health of our community. Most recently, he made a $1 million gift to benefit the John R. Anderson V Medical Pavilion, a new Scripps Clinic that is part of the Campaign for Cardiovascular Care.

“I am happy to play a small part in helping expand access to Scripps Clinic. It is a critical resource for our community,” Gene says.

Gene became a patient at Scripps Clinic after moving to the San Diego area in 1970. More than 40 years later, he remains a devoted patient, supporter and volunteer — serving as chairman of the heart, lung and vascular community advisory board and as a board member of Scripps Clinic and Scripps Green Hospital.

“I believe San Diego is blessed to have access to Scripps Clinic and its renowned cardiovascular care. It is part of a premier health care system that is among the best in the U.S.,” says Gene.

Gene also cites Scripps Clinic’s fellowship programs and clinical research programs as important investments. Both areas will be expanded through the Anderson Medical Pavilion.

L.E. and Virginia Simmons Honor Brent and Sarita Eastman

A member of the Prebys Cardiovascular Institute Advisory Board, L. E. has a history of supporting cardiovascular care.

“I am so impressed with the Eastmans’ mission of collaboration and their philosophy of building successful, synergistic teams of amazing people,” says L.E.

The Simmons’ gift, made through the Virginia and L.E. Simmons Foundation, will name a conference room at the institute in honor of both doctors.

“I feel that a conference room exemplifies collaboration, and so it was a perfect way to honor the Eastmans,” explains L.E. “In this age of sophisticated technology, everyone needs to learn from each other so we can grow together.”
In September 2012, Eileen and John (“Jack”) R. Anderson IV donated $25 million to help build the newest addition to Scripps Clinic, a 175,000-square-foot, multispecialty medical building on the campus of Scripps Memorial Hospital La Jolla. In honor of this tremendous gift, the John R. Anderson V Medical Pavilion is named after their youngest son, who passed away from cancer in 2004.

Jack and Eileen first heard about Scripps Clinic in the 1980s. From their first experience nearly 30 years ago to today, they’ve never gone anywhere else for their health care.

Through the years, Scripps physicians helped Eileen and Jack triumph over many serious medical conditions, including Jack’s heart surgery for an enlarged aorta. During the long days and nights that sometimes accompanied their care, the couple came to see their expert physicians as more than just doctors. “We think of Scripps as part of our family,” the Andersons echo.

A Commitment to the Future
The Andersons’ history of philanthropy with Scripps began almost as soon as they became patients. However, their most recent donation of $25 million to support Scripps Clinic holds a special place in their hearts. Honoring their son, it is a gift that recognizes both their commitment to family and to the health of our community.

“John was always trying to make life better for somebody else — and that’s what Scripps does,” says Jack. “They’re doing great things here, and we want to make sure they can continue to help others the way they helped us.”

“Through their generosity and spirit of giving, Jack and Eileen have enhanced the lives of others and enriched us personally,” says Chris Van Gorder, president and CEO of Scripps Health. “The John R. Anderson V Medical Pavilion will build on their legacy of giving, and help us continue to provide state-of-the-art care to our community for decades to come.”

Jack and Eileen continue to enjoy every day with each other, and spending time with their two other children, Wendy and Bruce, and grandchildren.

With tears in his eyes, Jack says, “If it wasn’t for Scripps, I wouldn’t be alive today.”
John R. Anderson V Medical Pavilion

Advanced Care in a Compassionate Environment

The John R. Anderson V Medical Pavilion will be a state-of-the-art medical center where physicians and staff provide the compassionate care and leading-edge treatment that are synonymous with Scripps Health.

This new Scripps Clinic facility will also help advance medical research and education, complementing our bench-to-bedside methodology that ensures patients have access to the latest medical discoveries and breakthroughs.

The Anderson Medical Pavilion will be connected to the world-class Prebys Cardiovascular Institute, and offer a wide variety of specialty services, including:

- Interventional and integrative cardiology
- Gastroenterology
- Pulmonary medicine
- Vascular surgery
- Neurology
- Neurosurgery
- Nephrology
- Diabetes and Endocrinology
- Infectious disease diagnosis and treatment

For more information about how you can support the John R. Anderson V Medical Pavilion, please contact us at 858-554-3046 or visit scripps.org/heartcampaign.
Last fall, Scripps Health reached a major milestone in providing leading-edge cancer care with the opening of the Scripps Radiation Therapy Center. Located on the Torrey Pines Mesa, the state-of-the-art facility offers the most advanced medical technology in the world to treat — and help beat — the disease.

Combining radiation cancer treatment services from Scripps Memorial Hospital La Jolla and Scripps Green Hospital, the $44 million, 41,000-square-foot facility is specially designed to take advantage of the latest technology while providing a comfortable, healing environment for patients.

The focal points of treatment are three highly sophisticated linear accelerators, which deliver carefully calculated doses of high-energy radiation, damaging or killing cancer cells while minimizing the impact on surrounding tissues and organs. Powerful, fast and flexible, they allow physicians to treat patients with greater precision and in less time than other approaches. One of the accelerators, the TrueBeam STx, is only the third in use in Southern California. The center also has 10 exam rooms and an ambulance bay. The 30-member professional staff includes radiation therapists, physicists, nurses, dosimetrist and patient service representatives.

For more information about how you can support the Scripps Radiation Therapy Center, call us at 858-554-3046 or visit scripps.org/giving.
Fulfilling a Dream to Care for Others

At age 10, Agnes Barrelet told her parents that she wanted to be a neonatal nurse and work in the newborn nursery. While she did not become a nurse, Agnes did fulfill her dream of becoming involved in the medical field — as a donor and volunteer.

Agnes has been a Scripps patient for years, and became more involved in fundraising in gratitude for the care her sister received here.

As a member of the Scripps Cancer Care, Stevens Division, Planning and Development Council, the Rancho Santa Fe resident partners with Scripps and opens her home for community presentations. These events, presented by Scripps physicians, provide expert insight about cancer-related topics and give the attendees a chance to interact with leaders in the field.

“I want the community to get to know Scripps and understand that it is a private nonprofit that needs their support,” says the French native, who runs her own charitable organization to assist underprivileged children. “Events with the physicians are very powerful; and I feel that once they understand Scripps, people will want to support the organization as much as I do.”

H.G. Fenton Company Donates $3 Million for Breast Cancer Services

Thanks to the support of H.G. Fenton Company, Scripps Health will be able to enhance and expand vital women’s services.

The new Emily Fenton Hunte Breast Care Center at Scripps Green Hospital will be a 5,000-square-foot facility that utilizes state-of-the-art tools and diagnostics, including four digital mammography units that improve early detection and breast biopsy capability. The center will also have trained breast care coordinators to help facilitate access to additional diagnostic testing and patient and family education. With views of the Pacific Ocean, it will offer a warm and nurturing environment that promotes healing.

The center is named in honor of Emily Fenton Hunte, whose motivation for giving was simple.

“My mother wanted to help people,” recalls Letitia Hunte Swortwood.

As part of the extensive Scripps network, the center already holds a prestigious accreditation from the National Accreditation for Breast Centers, a program of the American College of Surgeons. The Fenton Company’s generous gift will ensure that Scripps is able to remain on the leading-edge of breast health and care.

For more information about how you can support women’s services at Scripps Green Hospital, call us at 858-554-3046 or visit scripps.org/giving.
EXPANDING HEALTH CARE

Every year we treat more than a half-million patients through the dedicated efforts of 2,600 affiliated physicians, 13,500 employees and 1,600 volunteers. As our Southern California population continues to grow, we are rising to the challenge by expanding emergency and other health care services throughout our network. Creating new facilities and modernizing our existing ones enables us to continue saving and enriching lives, train physicians for the future and advance medical research. We would not be able to do this without significant philanthropic support.
The Campaign for Scripps Encinitas

Phase I Reaches $38 million Goal to Expand Emergency Care

Thanks to our generous donors, physicians, staff and community leadership, the Campaign for Scripps Encinitas reached its Phase I $38 million goal to expand emergency care for our North County communities. The campaign supports a multi-phase effort under way at Scripps Encinitas to ensure that we continue to provide advanced lifesaving care to individuals and families — when they need it most.

The funds raised during Phase I are helping us build a two-story, 62,000-square-foot critical care building that includes a 27-bed emergency center on the ground floor and a 36-bed medical/surgical unit on the second floor. Opening in 2014, the critical care building will also include state-of-the-art diagnostic and surgical equipment, expanded ambulance bays and specially designed private patient rooms.

We are thankful to all those who have supported the campaign through their generosity of resources, time and spirit. We are especially thankful to Tom and Mary Ellen Grant, who made the very first donation to the campaign of $1 million. Inspired by their commitment, additional significant contributions followed from the Leichtag Foundation, LaVerne and Blaine Briggs, and many others.

We also thank the members of the Scripps Memorial Hospital Encinitas Community Advisory Board and Circle of Life 100 support group, who led the successful 354 Campaign that raised more than $1 million toward our expansion.

In 2013, we are embarking on Phase II of the campaign to further expand vital services. For more information about how you can support these efforts, please call 760-633-7722 or visit us at scripps.org/giving.

354 Campaign

Bringing the community together and exceeding its goal, the 354 Campaign raised more than $1 million to benefit the expansion efforts under way at Scripps Memorial Hospital Encinitas.

The grassroots effort, named for the address of the hospital, was led by volunteers, including community advisory board members and members of Circle of Life 100, a service organization that raises awareness and support to benefit vital health services at Scripps Encinitas.

A dedicated promenade adjacent to the new emergency department will include benches, trees and columns of tiles to recognize those who made gifts to the 354 Campaign.
Philanthropy Fuels Encinitas Expansion

At the center of the Campaign for Scripps Encinitas is a 62,000-square-foot, state-of-the-art critical care building — but at its heart are the numerous community supporters and individuals who have donated significant funds, time and energy to make the vision a reality.

As a result of the community’s generosity, the new facility at Scripps Memorial Hospital Encinitas will open in spring 2014. Designed to accommodate North County’s growing population, it will be the first major campus expansion since 1992.

“We are incredibly thankful to our donors and community advisory board members who have helped us move closer to expanding health care for North County families,” says Carl Etter, the hospital’s chief executive. “Their commitment to the health of our community is vital to ensuring that our families, friends and neighbors continue to have access to world-class health care close to home.”

Advanced Care for Our Community

Last August, hospital supporters saw their efforts in action when the final beam was placed on the skeleton of the critical care building.

Once completed, the new structure will include a 27-bed emergency department; a 12-bed emergency observation unit; six ambulance bays for improved access for first responders; a helipad; and 36 new medical/surgical beds on the second floor, all in private rooms for greater patient comfort and confidentiality.

Celebrating 50 Years of Caring

In 2014, Scripps Memorial Hospital Encinitas will celebrate 50 years of caring for our community with the latest advancements in health care and treatment. As part of the extensive Scripps Health network of hospitals and outpatient facilities, Scripps Encinitas is widely recognized for medical excellence and specialty care.

Watch for news about community celebrations throughout the year, culminating with a historic celebration event in spring 2014. Sign up for our e-Update newsletter to receive important information and updates at scripps.org/emails.
Elisabeth “Jinx” Ecke Receives Distinguished Achievement Award

In 2012 the Circle of Life 100 honored La Costa Glen resident Elisabeth “Jinx” Ecke with their annual Distinguished Achievement Award. As a volunteer and generous supporter of Scripps Encinitas, Jinx and the Ecke family have been committed to enriching the lives of others through service and philanthropic leadership.

Born in Indiana, Jinx had a modest upbringing. Her parents later moved the family from the Midwest to California and, after driving across the country, they arrived in San Diego with only $100.

“They really struggled for a long time,” says Paul Ecke, III, Jinx’s son. “I think my mother’s childhood experiences influenced her passion and energy to give back.”

When Jinx began to raise a family of her own, it was important to her to get involved in the community. She was an active community organizer and volunteer supporting education and health care causes. From canvassing neighborhoods and mobilizing voters to hosting and planning fundraising events, Jinx saw volunteering as part of her civic duty.

In 1991, Jinx focused her efforts on enhancing community health care for North County residents. She chaired the Scripps Encinitas Gala and helped raise funds to expand the hospital’s emergency department.

“She led by example — teaching us that it is important to have a purpose and believe that you can make a difference,” says her daughter, Lizbeth.

Today, the Ecke family legacy of philanthropy and support continues. Building upon their mother’s efforts more than two decades ago, Jinx’s children, Paul and Lizbeth, gave $100,000 through the Ecke Family Foundation in 2010 to benefit the emergency department expansion at Scripps Encinitas. To date, the family has donated more than $500,000 to support the hospital. Paul also serves on the hospital’s community advisory board, which was instrumental in raising $1 million through the 354 Campaign.

“We have been blessed with good fortune and the opportunity to invest in the health of our community,” says Paul. “We are proud to support Scripps Encinitas to ensure our family, friends and neighbors have access to the most advanced medical care available.”

5th Annual Champagne Toast

More than 150 guests who support Scripps Memorial Hospital Encinitas celebrated another successful year at the 5th Annual Champagne Toast last December. Held at the Rancho Santa Fe Garden Club, the event recognized the achievements of the Campaign for Scripps Encinitas.
THANK YOU FOR YOUR COMMITMENT TO OUR COMMUNITY

Scripps Health Foundation is supported by extraordinary community leaders who are members of our community advisory boards. Working closely with our hospital leadership and foundation staff, these special individuals have generously donated their talents and time — as well as significant funds — to help us achieve our goals of providing world-class health care to San Diegans and all those who may need our services. Shoulder-to-shoulder, they stand beside us in our mission, and we are deeply grateful for their commitment to Scripps Health and the health of our community.

Eric Topol, MD, director of STSI and chief academic officer of Scripps Health (left) demonstrates the latest advancement in digital medicine technology to PBS television host Tavis Smiley. World-renowned, Dr. Topol was named the most influential physician leader in health care by Modern Healthcare magazine in 2012.

_Scripps is at the forefront of genomic medicine and wireless health technology, and we are advancing medicine through clinical research and graduate medical education. Our discoveries, such as the potential ability to predict heart attacks before they happen, have an impact far beyond the laboratory and directly benefit our patients._

_Philanthropy plays a vital role in helping us transform medicine. To date, we have raised more than $17 million to support the exciting efforts under way at the Scripps Translational Science Institute (STSI), which translates the latest genomics advancements and digital innovations into new diagnostics and treatments._

_We are grateful to all of our donors who have partnered with us in this journey to explore and unravel the mysteries of medicine to help improve the lives of others._
The Lavin Family Foundation Funds Research Professorship

During his distinguished 50-year career at Alberto Culver, Leonard H. Lavin turned his company into a multi-billion dollar enterprise, manufacturing renowned personal care products and household items. Today, he continues to support innovation and individualized care that will benefit the masses. Through the Lavin Family Foundation, he recently made a very generous gift to support a medical research professorship at Scripps Translational Science Institute (STSI), a division of Scripps Health that aims to revolutionize medicine through the study of genetics and genomics.

“We are grateful for the generous philanthropic contribution from the Lavin Family Foundation,” says Eric Topol, MD, director of STSI and chief academic officer at Scripps Health. “With support for ongoing research, we’ll eventually be able to tailor medications to a person’s specific genomic make-up. We couldn’t be more excited about the possibilities this holds.”

The Leonard H. Lavin Professorship at the Scripps Translational Science Institute will be held by Ali Torkamani, PhD, a leader in the field of quantitative genetics and genomics. Dr. Torkamani and fellow researchers at STSI are working to accelerate the genetic understanding of life-threatening diseases — which could translate into new drug discovery programs and more effective treatment methods.

Dr. Torkamani also lectures in STSI’s clinical trial design graduate course, and is helping to educate and cultivate the next generation of clinical and translational scientists.

“I am honored to receive the Leonard H. Lavin Professorship,” he says. “Philanthropy is essential in helping us continue our efforts to ensure that many serious health conditions become a thing of the past.”

For more information about how you can help support groundbreaking research at Scripps Translational Science Institute, please call 858-626-6357.

Scripps Proton Therapy Center Opens This Fall

Scripps Health is continuing to expand its nationally recognized cancer program to benefit individuals and families throughout the region. Opening in fall 2013, the Scripps Proton Therapy Center, located in the Mira Mesa area of San Diego, has the capacity to treat 2,400 patients per year. Proton therapy utilizes highly sophisticated equipment to treat adult and pediatric cancers that have not spread, including cancers of the prostate, brain, eye, lung, spine, breast, head and neck. The 102,000-square-foot center will provide the most comprehensive range of radiation therapy options available, enhancing the services available through Scripps.
Unlocking the Future of Medicine
*The Shaffer Family Foundation Supports Groundbreaking Medical Research*

Progressive thinking has led to great success for Jim and Tanya Shaffer. Honoring their philosophy, they are proud to help fund innovative medical research that may revolutionize health care in the future. Recently, their foundation, the Shaffer Family Foundation, made a gift to support the IDIOM study — short for “Idiopathic Diseases of Man.”

The groundbreaking study uses whole genome sequencing to help determine the causes of idiopathic human diseases — those serious, rare and perplexing health conditions that defy a diagnosis or are unresponsive to standard treatments.

The IDIOM study is part of a new frontier in medicine, in which researchers collect information on all 6 billion data points in the human genome — an individual’s complete set of genetic material — and look for mutations that could cause illness. It is believed to be the first whole genome sequencing study of adult idiopathic disease to date.

“Our mission is to fund medical research that increases the probability of curing disease in our lifetime and benefits a vast population,” say Tanya. “We believe that supporting forward-thinking physicians like Dr. Topol and his team will unlock the medicine of the future.”

In addition to supporting genomic research at Scripps Health, the Shaffer Family Foundation is helping fund leading-edge programs at the Shiley Center for Orthopaedic Research and Education (SCORE) at Scripps Clinic, including development of a bioprinter capable of printing 3D shapes of tissue material for cartilage and bone replacement.

“We are excited to support institutions like Scripps that are pushing the envelope of innovation and not afraid to step outside the box,” says Tanya.

LVAD Program Receives Advanced Certification

Scripps Health’s Left Ventricular Assist Device (LVAD) Program, which brings hope to eligible patients with advanced heart failure, has earned the Certificate of Distinction for Advanced Certification in Ventricular Assist Device from the Joint Commission. A sign of quality, the certification reflects an organization’s commitment to meeting certain performance standards.

An estimated 5 million individuals in the U.S. suffer from congestive heart failure, a chronic condition that occurs when the heart muscle is failing and unable to pump blood throughout the body.

Under the medical directorship of J. Thomas Heywood, MD, the program offers patients the LVAD, a mechanical device that is attached to the heart through surgery and helps it pump blood. The innovative therapy can stabilize a patient’s condition and improve the quality of life. After receiving an LVAD, most patients say they usually feel more energetic and more capable of enjoying their lives.

For more information about how you can support the LVAD Program, please contact us at 858-626-5390.
$3.75 Million Qualcomm Grant Supports Wireless Medicine Research

“The support from the Qualcomm Foundation positions us to catalyze the future of digital medicine — a new form of health care that is remarkably precise, tailored to individual patients and designed to engage them in their own care,” says Eric Topol, MD, Scripps Health’s chief academic officer and director of STSI.

The grant will advance clinical trials of biosensor systems, microscopic sensors that are put in the blood stream to detect the earliest indicators of heart attacks, type 1 diabetes and certain types of cancer. Scripps researchers will work to develop mobile apps for the embedded biosensors that will wirelessly send medical data to the patient’s smartphone, triggering a message to seek treatment when needed.

The grant also supports development of a handheld genotyping device that can determine a patient’s DNA compatibility with certain drugs, which could lead to a radical change in the way prescriptions are filled at pharmacies and help eliminate the costly use of ineffective drugs.

Remembering Walter J. Zable (1915-2012)

As a progressive inventor and businessman, Walter J. Zable changed the landscape of national security and mass transit systems — from missile-tracking technology to transportation smart cards used in subways around the world. Through ingenuity and hard work, he transformed a small business into a $1 billion global enterprise, Cubic Corporation.

For more than 60 years, Walter led Cubic through innovation and transformation. At age 97, he was the oldest active executive at any publicly traded company.

As Walter developed revolutionary electronics with global applications, he also supported the advancement of medical technology right here in San Diego.

A longtime friend of Scripps, Walter supported heart and orthopedic care at Scripps Clinic and Scripps Green Hospital. He also made gifts to our graduate medical education and fellowship programs, benefiting future generations of physicians and medical scientists. Although he passed away in June 2012, Walter’s legacy lives on in the lives of those he inspired in so many ways. With fond memories, we extend our deepest sympathies to his family and friends.
Hervey Family Fund Helps Advance Scripps Robotics Program

The children of Jean and James Hervey are reminded each day of the benevolence of their parents. As advisors for the Hervey Family Fund at the San Diego Foundation, they honor their legacy by granting millions to enrich our community.

In 2011 the Hervey Family Fund made two gifts — totaling $1.1 million — to support the Campaign for Scripps Mercy Hospital. Specifically, the contributions benefited the $2.5 million challenge grant by Doug Barnhart to develop robotic surgical suites at Scripps Mercy.

The innovative surgical suites will provide the technology and space for surgeons throughout the Scripps Health care system to perform minimally invasive robotic surgeries. The new operating rooms will also be equipped with advanced video conferencing capabilities to teach surgeons and medical specialists about the benefits of lifesaving, robot-assisted surgical procedures.

“The decision to support Scripps Mercy Hospital was easy. The hospital provides vital care to the core of San Diego and it is in great need,” says Matthew Hervey, one of the Hervey Family Fund advisors. “By supporting the challenge grant, the value of our gift is doubled. It is an investment in the future health and well-being of San Diego, and I’m excited to watch it grow.”

The Hervey Family Fund was established in 2000, with an $85 million bequest from Jean Hervey. Jean wanted to support the community that had supported her family and late husband for so many years.

“By giving everything they had to charity, my parents committed an incredible act of social responsibility,” says Matthew. “It is a privilege to fulfill their wish to inspire others to give back, get involved and support Scripps Mercy.”

For more information about how you can support Scripps Mercy Hospital, please call us at 619-686-3836 or visit us at scripps.org/giving.

Mercy 1000 Celebrates Spirit of Giving

Members of Mercy 1000 gathered together last December to celebrate the generous donors who have helped us raise awareness and funds to support Scripps Mercy Hospital. Mercy 1000, which began in 1981, is part of Scripps President’s Council, our prestigious giving club that provides benefits to donors who annually contribute $1,000 or more in unrestricted gifts to support the greatest needs at Scripps Health. (You can read more about this giving opportunity on pg. 29.)
Darlene Shiley Commits $5 Million to Support Scripps Clinic

Building on a legacy of giving that started more than 30 years ago, Darlene Shiley has committed $5 million to Scripps to support advanced orthopedic care. The Donald P. and Darlene V. Shiley Musculoskeletal Center will consolidate Scripps orthopedic subspecialties to offer comprehensive treatment and research at one convenient location on the first floor of the Anderson Outpatient Pavilion.

“The Shiley Musculoskeletal Center is slated to open in 2014.

Darlene and her late husband, Donald, have been part of the Scripps family for more than three decades — supporting programs and services across a wide continuum of care from bench to bedside — and we are very fortunate to be the beneficiary of their continued generosity and support,” said Chris Van Gorder, president and CEO of Scripps Health. “This gift underscores their commitment to the health of our community, and will help increase access to world-class orthopedic treatment and care.”

The new Shiley Musculoskeletal Center will centralize a wide array of services, such as orthopedic surgery (including internationally regarded programs in joint replacement and reconstructive surgery for the hand, elbow, foot, ankle, shoulder and hip); neurosurgery; sports medicine; podiatry; rheumatology; and state-of-the-art diagnostics and rehabilitation.

The facility will also be home to groundbreaking orthopedic research and provide training to the next generation of physicians. Two post-graduate fellowships will be added, and additional orthopedic specialists will be recruited.

For more information about how you can support the Donald P. and Darlene V. Shiley Musculoskeletal Center at Scripps Clinic, please contact us at 858-554-3046 or visit us at scripps.org/giving.
Caring for our community is the foundation of all that we do at Scripps. We honor this commitment every day by providing leading-edge health care to families and individuals from Chula Vista to Oceanside. Donors play a vital role in our efforts, and we are extremely grateful for the generosity that is helping us continue our mission.

Last year the Scripps Mercy Hospital capital campaign, Caring for the Future, culminated in raising more than $35 million to modernize and expand this important community resource. And, thanks to philanthropy, Scripps Whittier Diabetes Institute continues to advance diabetes prevention and care. In addition to donor gifts, the guidance of our community advisory boards has helped us accomplish significant achievements that continue a legacy of medical excellence to ensure San Diegans will have access to the latest treatments and compassionate care — both today and tomorrow.
Philanthropy Helps Project Dulce Pay Off

Project Dulce, a comprehensive community outreach effort initiated by Scripps Whittier Diabetes Institute to fight diabetes in San Diego County’s Latino population, celebrated 15 years of service in 2012. Largely funded by philanthropy, research shows that it’s paying off.

Founded by a broad collaboration of San Diego health care and community-based organizations, the project combats diabetes by recruiting peer educators from the community to work directly with patients — educating them about changing eating habits, adopting exercise routines and other ways to help manage this chronic disease.

A paper featured in Clinical Diabetes, the journal of the American Diabetes Association, analyzed program outcomes over the last 15 years and revealed that Project Dulce participants experienced drops in blood sugar, cholesterol and blood pressure levels.

According to Athena Philis-Tsimikas, MD, corporate vice president, Scripps Whittier Diabetes Institute, and lead author of the paper, the secret to the program’s success is the promotoras, specially trained advocates from within the Latino community who teach classes in Spanish to patients diagnosed with or at risk of developing type 2 diabetes.

“As members of the community, promotoras are able to relate to the Latino population,” says Dr. Philis-Tsimikas. “This helps overcome cultural barriers and encourages participants to adopt a healthier lifestyle that can prevent or reverse the disease.”

The study also showed that patients who worked with a promotora had markedly better results than those who received traditional diabetes management. The program has been so successful that Scripps has provided special training across the nation to help other health care systems adopt Project Dulce’s innovative strategies.

For more information about how you can support Scripps Whittier Diabetes Institute, please call 858-626-5390.

2nd Annual M.O.S.T. Mariachi Festival Celebrates 25 Years and 10,000 Patients

Last September, more than 200 supporters joined us to celebrate the 25th anniversary of the Mercy Outreach Surgical Team (M.O.S.T.) and commemorate the group’s 10,000th surgery. Featuring lively music and folkloric dancing, as well as live and silent auctions, the 2nd Annual M.O.S.T Mariachi Festival raised $100,000 to support outreach surgical programs primarily for pediatric patients in underserved communities in Mexico.

“We are grateful to our generous donors and volunteers,” says George Ochoa, president of M.O.S.T. “Together, we have changed the lives of more than 10,000 patients who otherwise would not have access to the care they need.”

M.O.S.T. is funded entirely through philanthropy. For more information about how you can support M.O.S.T., please call 619-686-3633 or visit scripps.org/most.
Linda Loehr: Making a Difference in Diabetes Care

Each year Scripps Whittier Diabetes Institute treats nearly 10,000 patients with diabetes, thanks in large part to passionate donors like Linda Loehr.

“My daughter has greatly benefited from the significant advances made in diabetes care during the past three decades,” says Linda, who has supported Scripps Whittier since 1995. “I am happy to give to programs and research that further enhance care for people living with diabetes.”

Linda’s daughter, Lori, was diagnosed with type 1 diabetes in 1970.

“The onset was very sudden. Lori was 13 and went into a coma during the middle of the night,” Linda recalls. “We were frightened by her diagnosis but we were relieved when we learned that Lori’s diabetes could be managed with constant monitoring.”

Since then, Lori has maintained a healthy diet, exercised regularly and participated in experimental trials to better manage her diabetes. She has also benefited from revolutionary advances in monitoring technology.

“When Lori first began using an insulin pump, it was a turning point in her life,” says Linda. “Now, 28 years later, she uses an iPhone to monitor her blood glucose levels.”

With ongoing developments in diabetes care, Linda and Lori continue to educate themselves about managing the disease. Together, they often attend community seminars hosted by Scripps Whittier.

“Each time we attend, we learn something new,” says Linda.

Through her generosity, Linda continues to support research that holds great promise for finding new and improved treatments for the disease.

Celebrating the Opening of the Conrad Prebys Emergency & Trauma Center

The historic $10 million gift from Conrad Prebys to Scripps Mercy Hospital in 2006 led the way for construction of a new emergency department. In 2012, thanks to the support of additional donors, the hospital opened the doors of the Conrad Prebys Emergency and Trauma Center to serve our community.

One of the busiest emergency departments in the County of San Diego, the state-of-the-art facility is accessible 24 hours a day, seven days a week.

The 27,000-square-foot space features 49 beds; 4 trauma bays; a dedicated CT scanner adjacent to the trauma bays that eliminates the need to transport patients for testing; a telemetry room that allows continuous monitoring of all patients; and an in-house lab to expedite test results so patients can be diagnosed and treated as quickly as possible.
Cory Crommett is passionate about getting his community involved in Scripps Memorial Hospital Encinitas. The Olivenhain resident credits the hospital for both saving his life and for helping him say goodbye to his father, who passed away from lymphoma in February 2012.

“I am so thankful that my dad’s physicians, Ron MacCormick, MD, and Scott Eisman, MD, were truthful with me about his condition,” says Cory.

Because of their compassion and honesty, I was able to hold my dad in my arms as he drew his last breath.”

A few months later, Cory found himself whisked to the emergency room at Scripps Encinitas for a suspected heart attack. After an angiogram found that a small artery was completely blocked, the 54-year-old retired industrial contractor received a stent immediately. The entire process took about 90 minutes.

“It was amazing, I woke up hungry” he laughs. With the support of his wife, Karen, Cory lost 70 pounds in four months after his heart attack, and continues to maintain good health.

Cory is a member of the Scripps Encinitas Memorial Hospital Community Advisory Board and also hosts events with Karen to support the Campaign for Scripps Encinitas. His firsthand experiences with Scripps have fueled his commitment.

“I am truly grateful to Scripps Encinitas for getting me to the other side of the rainbow,” says Cory. “I will continue to contribute however I can to this wonderful place. It is part of the Crommett DNA to give back, and I can think of no better organization to support than Scripps Encinitas.”

For more information about how you can support the vital expansion of emergency services at Scripps Encinitas, call us at 760-633-7722 or visit scripps.org/giving.
Jere Oren finds a Win-Win Situation with Charitable Annuities

Joyce and Jere Oren

Jere Oren has been a volunteer at Scripps Memorial Hospital La Jolla since 1979, sharing his warmth by greeting patients and visitors at the front desk. In 2005, Jere decided to become more involved after he and his wife, Joyce, attended a special presentation about life estate gift annuities hosted by Scripps Health Foundation.

As a philanthropist and someone who owns several properties, Jere immediately realized that setting up an annuity for his home was a great opportunity. The annuity would allow him to continue to live in the home and also receive a secure income from Scripps Health for the rest of his life based on the value of the home. After his lifetime, the proceeds from the sale of the home will help support the most urgent needs at Scripps La Jolla.

“Setting up a life estate gift annuity was perfect for someone in my situation,” says Jere. “The annuity has allowed me to donate to a great organization like Scripps and increase my income at the same time. It’s a win-win situation.”

Inspired by being able to support lifesaving care in this way, Jere has also made additional donations of cash and other property in exchange for gift annuities to benefit several important areas within the Scripps network, including the Prebys Cardiovascular Institute; Scripps Cancer Care, Stevens Division; and the expansion of critical care services at Scripps Memorial Hospital Encinitas.

“I am happy to know my contributions will help Scripps continue to provide excellent health care for years to come” he says.

For more information about planned giving opportunities, please contact the Office of Gift Planning at 858-678-7120 or visit us at scrippsheritage.org.

Ways to Give

All gifts, no matter the size, help us continue to provide world-class health care. Join us as we usher in a new era of medicine that will serve our community for generations to come.

There are many ways to give, including:

- annual cash donations
- tribute and memorial gifts to honor someone special
- appreciated stocks and bonds
- gifts of real estate
- estate gifts, including charitable gift annuities and charitable remainder trusts
- contributions made through payroll deduction

For more information about giving opportunities, please call us at 800-326-3776 or visit us at scripps.org/giving.
Frontiers in Medicine Showcases Scripps Cancer Care

One of the most exciting benefits of being a Scripps President’s Council member is the opportunity to attend exclusive Frontiers in Medicine presentations. Since 1994, the Frontiers in Medicine series has featured key Scripps physicians and leaders who share the latest discoveries in disease diagnostics, prevention and treatment with our community.

Last November at our “Transforming Cancer Care” event, Scripps President’s Council members had the chance to learn about the breadth of our state-of-the-art treatments and facilities, including the new Scripps Radiation Therapy Center, which opened last August, and the Scripps Proton Therapy Center, which will open this year. The Scripps Radiation Therapy Center serves Scripps patients from across the region. The Scripps Proton Therapy Center will be the first facility in San Diego to offer this state-of-the-art therapy, which uses a controlled beam of protons to target and destroy tumors with unprecedented accuracy.

The expert panel included Ray Lin, MD, medical director of the Scripps Radiation Therapy Center; Carl Rossi, MD, medical director of the Scripps Proton Therapy Center; Carol Salem, MD, medical director of the Scripps Health Minimally Invasive Robotic Surgery Program; Kenneth Shimizu, MD, medical director of the San Diego Gamma Knife Center at Scripps Memorial Hospital La Jolla; and William Stanton, MD, medical director of cancer care at Scripps Mercy Hospital, San Diego.

For more information about Frontiers in Medicine, please call 858-678-7063 or email presidentscouncil@scrippshealth.org.

Scripps President’s Council: The Benefits of Giving

Scripps President’s Council members are generous, community-minded friends who support Scripps through annual gifts of $1,000 or more in unrestricted funds.

Unrestricted gifts support our greatest needs in medical, research and operational priorities, allowing these important donations to serve a multitude of health care needs for our community and provide support for many vital programs and services.

In recognition of your Scripps President’s Council membership, you receive:
• Complimentary parking at all Scripps hospitals
• An invitation to our annual Scripps President’s Council recognition event
• Invitations to informative presentations by distinguished Scripps physicians and other renowned health care leaders, including our exciting “Frontiers in Medicine” series
• A free subscription to Scripps Health Foundation’s Update magazine
• Tax savings.*

Whether it is specialized care and equipment needed to save a life, or the medical research and excellence that helps prevent and cure diseases and injuries, unrestricted gifts help support the health of our community — today and tomorrow.

For more information about joining Scripps President’s Council, please call 858-678-7063 or visit scripps.org/giving.

*Please check with your personal financial advisors to determine the extent of any tax benefits you may receive as a result of your gift.
The Scripps Legacy Celebration, held last summer, was the first event of its kind, honoring the heritage, spirit and people of Scripps Health. Featuring a multimedia display in-the-round, a spectacular overhead musical performance and enchanting ambience, the celebration showcased the Scripps story that began more than a century ago and unveiled the highly anticipated book, “Good Company: The Story of Scripps Health and its People,” by Sarita Eastman, MD. More than 800 attendees — including Scripps leadership, physicians, staff and donors, as well as community and business leaders — enjoyed the festivities. The historical occasion was made possible in part by title sponsors United Healthcare and McCarthy.

“Champagne and Chocolate” was the theme of the 21st Annual Spinoff: Auction for Life, which raised more than $1 million to benefit Scripps Cancer Care, Stevens Division, at Scripps Memorial Hospital La Jolla. Nearly 500 guests sipped champagne and enjoyed chocolate from around the world while bidding on unique auction items to support Scripps. The event honored the Ellen Browning Scripps Foundation, which has consistently supported Scripps Health since 1947.
Day at the Races Posts $100K for Diabetes Care

Last August, 150 guests enjoyed a lively day at the Del Mar Race Track to raise funds for Scripps Whittier Diabetes Institute. The sold-out event featured a gourmet lunch and live and silent auctions to benefit Project Dulce, Scripps Whittier’s nationally recognized community outreach program.

42nd Annual Mercy Ball Raises $200,000

“Merci, Mercy” was the theme of Mercy Ball 2012, where more than 450 guests turned out for an evening of fine dining and dancing to support breast care services at Scripps Mercy Hospital. Held at The Grand Del Mar last November, the event raised nearly $200,000. The highlight of the evening was a heartfelt presentation, where each Sister of Mercy received a special plaque honoring them for their service and commitment to our community.

83rd Annual Candlelight Ball Rings in the Season Raising $2 Million

More than 400 guests shared their warmth and generosity during the 83rd Annual Candlelight Ball, held last December, at The Grand Del Mar, which raised more than $2 million to benefit Scripps Memorial Hospital, La Jolla. During the festive evening, Scripps leadership recognized longtime event chair Betty Knight Scripps, and revealed that the iconic plaza in front of the hospital will be named in her honor as The Betty Knight Scripps Plaza.

44th Annual Scripps Clinic Golf Tournament Tees Up Nearly $300,000

The 44th Annual Scripps Clinic Golf Tournament and Invitational Dinner, held last September, raised nearly $300,000 to support the Shiley Musculoskeletal Center. The center will provide comprehensive, leading-edge orthopedic services, help advance research and train the next generation of physicians.

For more information about our special events, please contact Benita Hartman at 858-678-6814 or hartman.benita@scrippshealth.org.
Founded through philanthropy, our donors are instrumental in continuing our legacy of caring for the community. From innovative care and treatments for heart disease and cancer to research in human genetics and wireless health, we are committed to helping San Diegans live longer and healthier lives.

SCRIPPS HEALTH FOUNDATION
Through philanthropy we help to heal, enhance and save lives.
